PRINT DROP · SPRITESPLIT

Print Drop: set up in 2 minutes

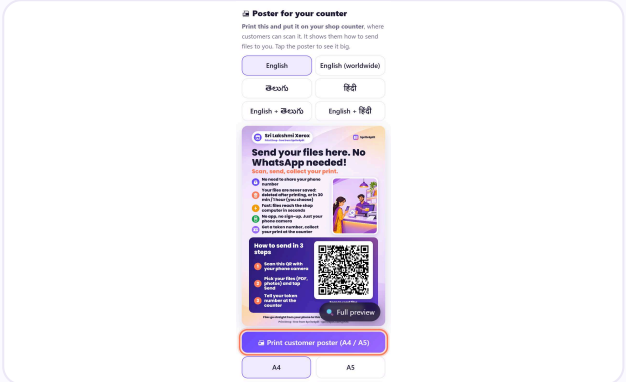

Customers send files to your shop computer by QR. No WhatsApp, no phone numbers, files delete themselves.

spritesplit.com/print
Scan to open Print Drop

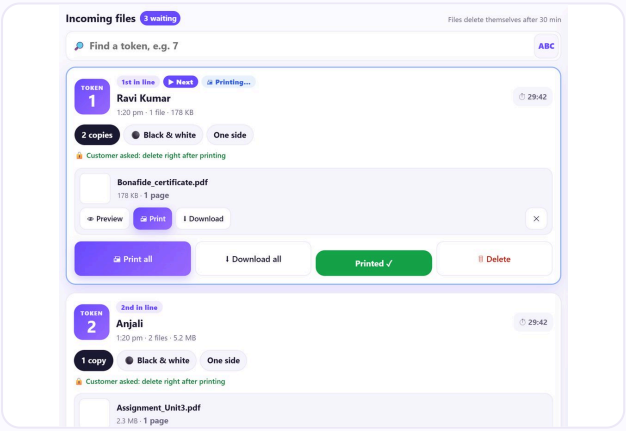

1 Open spritesplit.com/print

On the computer next to your printer, in Chrome or Edge. Type your **Shop name** and click ▶ **Start receiving**.

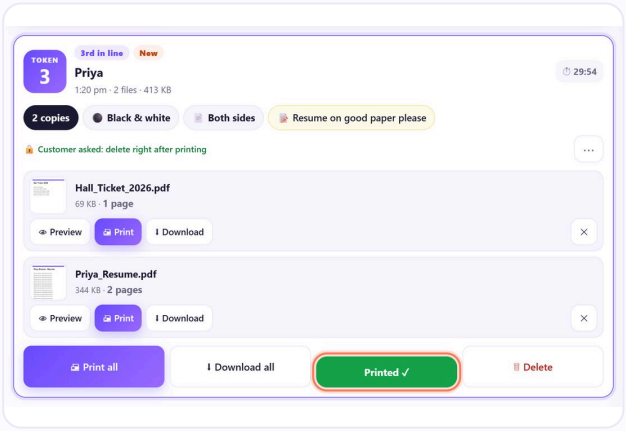

2 Print the counter poster

Under **Poster for your counter**, pick the language and click **Print customer poster**. Stick it at the counter. The QR never changes.

3 Files arrive with a token

Each customer gets a **TOKEN** number with copies, colour and sides. Ask “Which token?”

4 Print, then Printed ✓

Click **Print** (or **Print all**), hand over the prints and click **Printed ✓**. The files are deleted.

💡 Good to know

- Keep the Print Drop tab open all day. New files come with a sound.
- Files delete themselves after 10, 30 or 60 minutes (⚙ Settings) or on Printed ✓.
- Customer cannot connect? Ask them to join the shop Wi-Fi, or switch mobile data off and on.
- Free. No sign-up. Nothing is saved on any server.
